Cook 30% Faster than Traditional Whirlpool Brand Thermal Bake Ovens

Known for delivering fast and flavorful results, the True Convection cooking system features a third rear element and fan to circulate heated air over, under and around food.

Check Cooking Progress Without Opening the Door

The extra-large EasyView™ window and oven light make it possible to quickly check your food as it cooks inside the oven.

Minimize Cleaning with a Smooth Glass Surface

A ceramic glass CleanTop® cooktop withstands intense heat without cracking, preserving the sleek look for years to come. Plus, a smooth surface makes it easier to wipe up spills.

Additional Features

Adjust the Element to Match Your Pots and Pans

A dual radiant element creates twice the cooking power from just one element. The inner ring brings small pots to a boil quickly, while the outer ring evenly distributes heat through large pans.

Bake Based on Your Schedule

The Delay Bake function lets you choose a start time that works best for you. Set the oven to begin cooking while you're out—dinner is ready when you get home.

Create One Convenient Place to Efficiently Cook Multiple Dishes

Unite a freestanding range with a microwave hood combination to save time, effort and space in the kitchen. Defrost above, simmer below and bake within—it's easy to be efficient with a PowerPair™ cooking center.
